

Veterinary Journals – updated September, 2013

Journal Name	Impact Factor	Open Access	Additional Brief Manuscript Options	Word/page limits
Acta Veterinaria Scandinavica	1.35	Open – fee \$2035	Brief Comm.- Case reports	1000-1500 words
	<i>Acta Veterinaria Scandinavica</i> is an open access journal encompassing all aspects of veterinary research and medicine of domestic and wild animals.			
American Journal of Animal and Veterinary Science *	0.65	No- page charges		
	American Journal of Animal and Veterinary Sciences, a quarterly, peer reviewed publication and is dedicated for publication of research articles in the field of biology of animals and with the scientific understanding of how animals work: from the physiology and biochemistry of tissues and major organ systems down to the structure and function of bio molecules and cells; particular emphasis would given to the studies of growth, reproduction, nutrition and lactation of farm and companion animals and how these processes may be optimized to improve animal re- productivity, health and welfare. Articles in support areas, such as genetics, soils, agricultural economics and marketing, legal aspects and the environment also are encouraged. AJAVS is an important source of researcher to study articles on protection of animal production practices, herd health and monitoring the spread of disease and prevention in both domestic and wild animals.			
Animal Reproduction Science	1.9	Option \$2500	Review papers	
	<i>Animal Reproduction Science</i> publishes original research and timely reviews on topics relating to reproduction and fertility in animals . This includes both fundamental research and applied studies, including management practices that increase our understanding of the biology and manipulation of reproduction. The focus is on animals that are useful to humans including food- and fibre-producing; companion/recreational; captive; and endangered species including zoo animals, but excluding laboratory animals unless the study reveals new information that impacts our basic understanding of the biology or manipulation of reproduction applicable to the animals listed above. The journal's scope includes the study of reproductive physiology and endocrinology, reproductive cycles, natural and artificial control of reproduction, preservation and use of gametes and embryos, pregnancy and parturition, infertility and sterility, diagnostic and therapeutic techniques.			
BMC Veterinary Research	1.86	Open – fee \$2000	Methodology – Software – Database articles	
	<i>BMC Veterinary Research</i> is an open access, peer-reviewed journal that considers articles on all aspects of veterinary science and medicine, including the epidemiology, diagnosis, prevention and treatment of medical conditions of domestic, companion, farm and wild animals, as well as the biomedical processes that underlie their health.			

Irish Veterinary Journal *	0.44	Open – fee \$1730	Case studies – short reports	1000-1500 words
	<i>Irish Veterinary Journal</i> is an open access journal that publishes articles on all aspects of veterinary research involving both domestic and wild species of animals.			
Journal of the American Association of Laboratory Animal Science/Comparative Medicine	JAALAS 0.7 Comp Medicine 1.1	No, must be member	Case report/study-- clinical case in 1 or more animals with follow up	Research report – 5-10 pages
	The mission of The Journal of the American Association for Laboratory Animal Science (JAALAS) is to disseminate high-quality, peer-reviewed information on animal biology, technology, facility operations, management, and compliance as relevant to the AALAS membership.			
Journal of the American Veterinary Medical Association	1.7	No, membership	Case reports (clinical)	
	The mission of the JAVMA is to promote the science and art of veterinary medicine and to provide a forum for discussion and dissemination of ideas important to the profession.			
Journal of Animal Physiology and Animal Nutrition	1.254	Option ? \$2500	Short Comm.	3500 words
	As an international forum for hypothesis-driven scientific research, the journal publishes original papers on basic research in the fields of animal physiology, the biochemistry and physiology of nutrition, animal nutrition, feed technology, and feed preservation.			
Journal of Animal Science	2.5	No	Technical note	9 pages
	Articles published in <i>JAS</i> encompass a broad range of research topics in animal production and fundamental aspects of genetics, nutrition, physiology, and preparation and utilization of animal products.			
Journal of Animal and Veterinary Advances *	0.39 Pakistan	Open?	Short Comm.	2500 words
	No information listed.			
Journal of Veterinary Science	1.16	Open - Page charges	Short Comm./Case Report	8 pages
	The Journal of Veterinary Science (J Vet Sci) is an international peer-reviewed journal dedicated to providing to the advancement and dissemination of scientific knowledge concerning veterinary sciences and related academic disciplines. It covers all the scientific and technological aspects of veterinary sciences in general, anatomy, physiology, biochemistry, pharmacology, microbiology, pathology, public health, parasitology, infectious diseases, clinical sciences, alternative veterinary medicine and other biomedical fields.			
Livestock Science *	1.249	Option \$2500	Technical note	Broad scope
	<i>Livestock Science</i> promotes the sound development of the livestock sector by publishing original, peer-reviewed research and review articles covering all aspects of this broad field. The journal welcomes submissions on the avant-garde areas of genetic resources, tropical livestock farming, welfare, ethics and behaviour , in addition to those on genetics, breeding, growth, reproduction, nutrition, management, health, production, systems , and so on.			

Open Veterinary Journal *	? Libyan journal	Open – no fee	Short comm./ case reports	
	<i>Open Veterinary Journal</i> is a peer reviewed international open access online journal publishing high-quality original articles, reviews, short communications and case reports dedicated to all aspects of veterinary sciences and its related subjects. Research areas include the following: infectious diseases including zoonotic/food-borne importance, applied biochemistry, parasitology, endocrinology, microbiology, immunology, pathology, pharmacology, physiology, epidemiology, molecular biology, immunogenetics, surgery, ophthalmology, dermatology, oncology, animal reproduction, animal production and management, food science and animal nutrition.			
Open Veterinary Science Journal *	?	Open – fee \$600	Letter-Short Comm.	3000-6000 words
	<i>The Open Veterinary Science Journal</i> is an Open Access online journal, which publishes research articles, reviews, and letters in all areas of experimental and clinical research in veterinary science and medicine.			
Reproduction in Domestic Animals	1.39	Option \$3000	Short Comm.	1800 words incl. tables, figs, refs
	<i>Reproduction in Domestic Animals</i> is an international journal publishing original, significant articles on reproduction in domestic animals, laboratory animals, and wildlife, with particular attention to basic, applied and clinical research. Reproduction is considered in a broad context, with its strong disciplinary, comparative core. The journal therefore covers obstetrics, neonatology and udder health, and welcomes contributions in these areas.			
Research in Veterinary Science	1.774	Option ? \$3000	Short Comm.	1600 words
	<i>Research in Veterinary Science</i> is an International journal publishing original articles, reviews and short communications of a high scientific and ethical standard in the veterinary sciences . Subjects covered include anatomy, bacteriology, biochemistry, endocrinology, ethology, epidemiology, immunology, molecular biology, nutrition, parasitology, pathology, pharmacology, physiology, surgery, virology, welfare.			
Small Ruminant Research *	1.124	Option \$2500	Short comm. Technical note	8 pages total <4 journal pages
	<i>Small Ruminant Research</i> publishes original, basic and applied research articles, technical notes, and review articles on research relating to goats, sheep, deer, the New World camelids llama, alpaca, vicuna and guanaco, and the Old World camels . Topics covered include nutrition, physiology, anatomy, genetics, microbiology, ethology, product technology, socio-economics, management, sustainability and environment, veterinary medicine and husbandry engineering.			
The Veterinary Journal	2.42	Option \$3000	Short Comm.	1000 words
	<i>The Veterinary Journal</i> publishes worldwide contributions on all aspects of veterinary science and its related subjects. Research areas include infectious diseases , applied biochemistry, parasitology, endocrinology, microbiology, immunology, pathology, pharmacology, physiology, molecular biology, immunogenetics, surgery, ophthalmology, dermatology and oncology.			

Theriogenology	2.08	Option \$2500	Technical note	12 pages
	<i>Theriogenology</i> provides an international forum for researchers, clinicians, and industry professionals in animal reproductive biology . This acclaimed journal publishes articles on a wide range of topics in reproductive biology and biotechnology , including basic and applied studies in cryobiology of gametes and embryos, conservation biology, and assisted reproduction of domestic, wild, avian, and aquatic species.			
Veterinary Record	1.8	Option £1950	Short comm	1000 word text
	Veterinary Record is the official journal of the British Veterinary Association (BVA) and has been published weekly since 1888. It contains news, comment, letters and clinical research papers on a wide range of veterinary topics. It is published on behalf of the BVA by BMJ Group.			
Veterinary Research	3.43	Open – fee \$1535	Short reports	8 pages
	<i>Veterinary Research</i> is an open access journal that publishes high quality and novel research and review articles focusing on all aspects of infectious diseases and host-pathogen interaction in animals.			
Veterinary Surgery	1.242	Option \$3000	Restricted case studies with major impact	4000 words
	<i>Veterinary Surgery</i> , the official publication of the American College of Veterinary Surgeons and the European College of Veterinary Surgeons, invites submission of clinical and research reports that contribute knowledge within the broad field of veterinary surgery. Reports of interest include, but are not limited to, surgical techniques, patient management, pain management, diagnostic techniques, diagnostic imaging specific to surgical diseases, wound healing and infection, and metabolism specific to the surgical patient, veterinary surgical education and surgical history. In general, case reports describing observations in a single or several animals will not be considered unless the report makes a substantial contribution to veterinary surgical knowledge and is not merely additive to the existing literature. Clinical reports must have a minimum of 6-months follow-up to be considered; longer follow-up may be required for some surgical techniques or diseases. Authors of case reports that don't meet these requirements are encouraged to submit to Wiley's open access journal Clinical Case Reports .
