

How it Works

- 1 Vet approaches VMD Sciences with an unmet treatment need.
- 2 VMD Sciences compiles necessary regulatory documentation.
- 3 VMD Sciences manages international procurement and ensures importation compliance with local regulatory authorities.
- 4 After receiving required authorizations, VMD Sciences expedites delivery, enabling veterinarians to initiate treatment.

Why VMD?

Our team of regulatory and veterinary professionals are experts in compliant importation. We provide an end-to-end, hassle free experience for vets, allowing you to continue your daily practice with minimal interruptions.

HOW TO ACCESS VETERINARY MEDICATIONS LICENSED IN OTHER COUNTRIES

At VMD Sciences, our mission is to safely expand access to innovative veterinary medications for the benefit of pets, vets, and pet owners. We help veterinary professionals worldwide in accessing global treatment options to meet unmet medical needs within their practice, all while remaining compliant with their country's regulatory requirements for importation.

Our team of global regulatory and veterinary experts connect vets with treatment options that have yet to be approved in their home country. This pathway not only enhances patient care, but also paves the way for the broader adoption of therapies in veterinary practice, fostering advancements in animal healthcare worldwide.

VMD Sciences has previously connected veterinary specialists in academia and private practices with treatment options approved in other countries for various cardiac, reproductive, neurological, and oncological conditions. With our global network of pharmaceutical suppliers, the potential treatment options are infinite.

VMD ACCESS

Licensed veterinarians and pharmacists can now request a VMD Access Account to **browse eligible treatment options**, receive personalized **regulatory guidance**, and discover **innovative research opportunities**.

Head to vmdsciences.com to request an account or to get started with a treatment request form.
